Jobbery

Learn how to job before AI decides to rob

Domain 1: Aiversecity Future-Ready Workforce

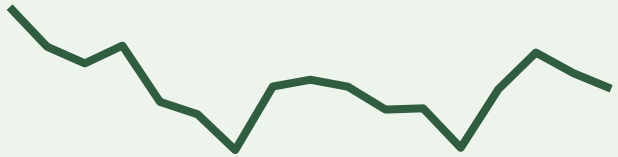

Team #slaynergy · SDC Hackathon 2026

As the ability to use AI is steadily decreasing, a call to action is necessary: Use it (AI) or lose it (your job)

Jobs projected to be lost to AI:

9.9% → 7.3%

DOSM Job Market Insights, 2022 Q2 to 2026 Q2 (published 18 Aug 2026). Down 27% from the peak; the quarterly series is noisy.

US employment at risk due to rapid computerization:

47%

To reduce AI's impact on employment, invest in education, digital literacy, and technical skills.

Sasana Kijang, & Mohd Arshad, A. P. D. M. N. (2024, September 19). Assessing AI-Induced job displacement in Malaysia [Academic conference paper].

Jobs expected to be highly affected by AI and digitalisation:

697,000

Workers are at risk of losing jobs to AI if upskilling is not done.

Human Resources Minister Datuk Seri R. Ramanan, 24 June 2026.

- The issue: Many of today's career tools give scattered and irrelevant AI advice with little to no consideration for long-term career stability.

End-to-end human connection: the worker and the advisor

The worker

Fresh graduates and members of the workforce

- A real deadline with actionable advice, powered by AI
- The app needs to know which skills expire, which jobs are within reach, and what to learn this week

The advisor

A real person to keep an eye on you, rather than just having an AI on you.

- The final, innately human, step of the reskilling
- Writes advice that lands on the worker's plan
- Pertubuhan Keselamatan Sosial (PERKESO) government servants to give human-centered advice to those who require it

Jobbery

Main features, INC.

Skills intake
Built-in résumé scanner which extracts skills while giving the user input to improve their resume.

AI-trend signal layer
Dated and trusted public sources, updated whenever new data is published

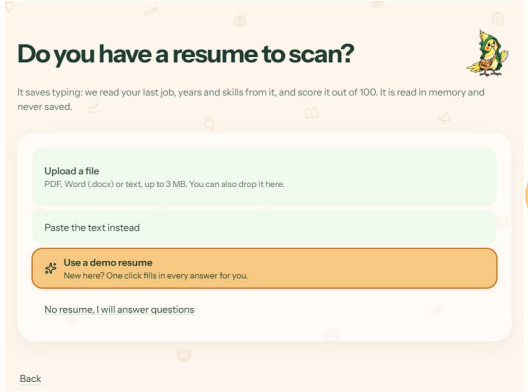

Role matching and skills gap
Discover which of your skills are at risk of becoming redundant and which skills should be prioritized.

Reskilling pathway
Actionable weekly steps, with links to free courses, completed with a quick call with a human advisor.

SDG mapping
A focus on SDG sub-targets of SDG 4.4, 5.7, 8.5, 9.2 and 10.3

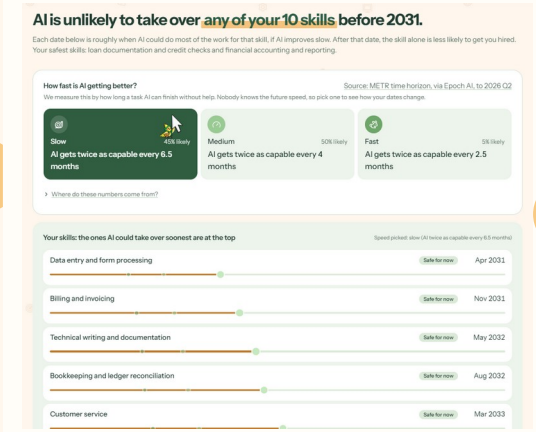

Handling uncertainty
Shows the skill changes for the cases of slow, medium and fast AI progression.

From résumé to roadmap in four simple steps.

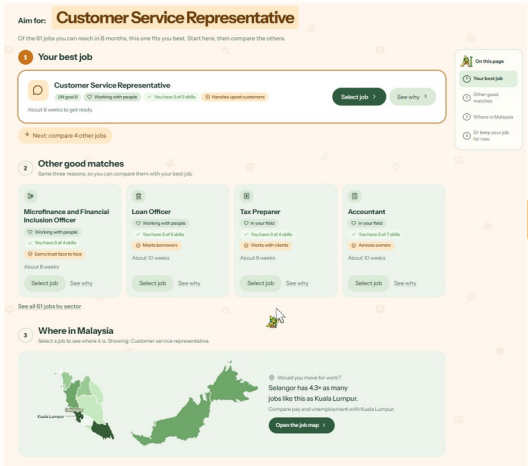

You

Introduce yourself, then scan a résumé or answer eight questions. Nothing is stored.

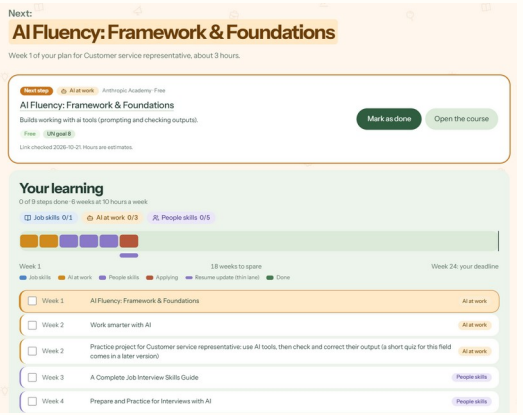

Skills

Every skill gets an expiry date, under conditions of either slow, medium or fast AI progression.

Jobs

Roles you can reach, and the skills you need to get there.

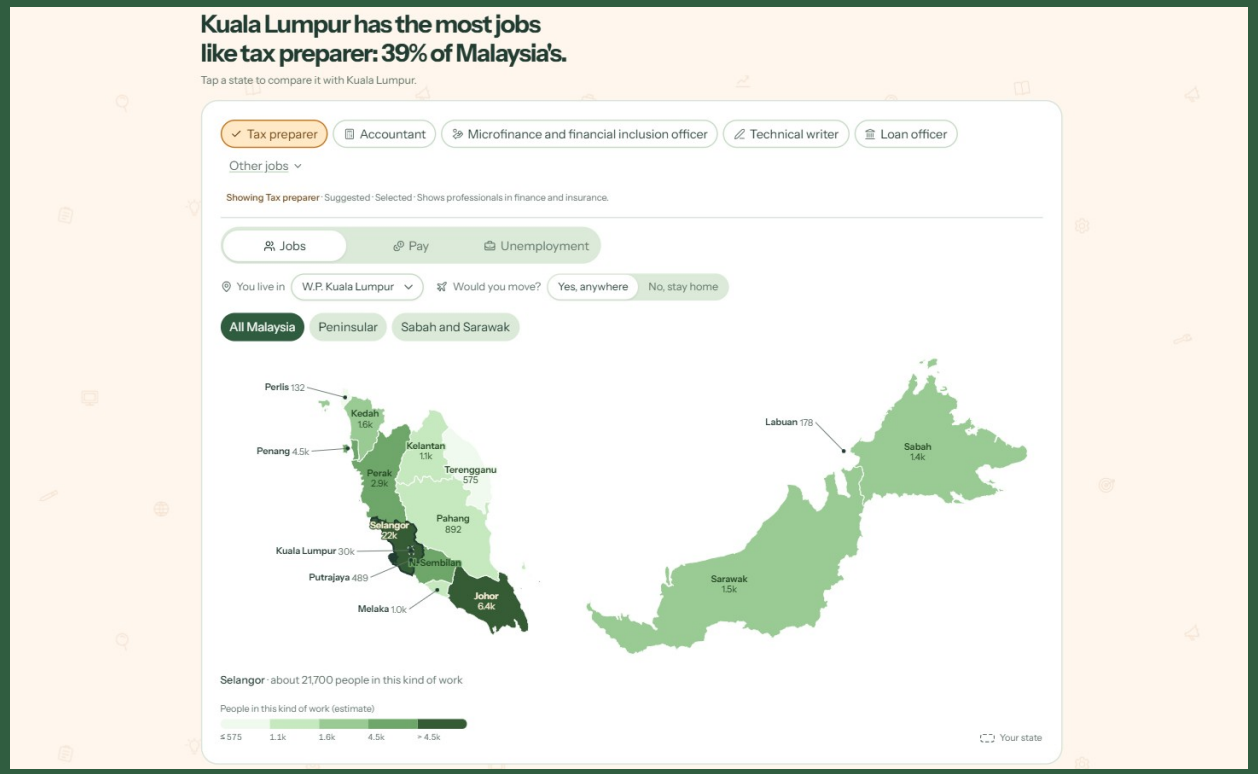

Plan

Week by week, with free courses, culminating in a meeting with the advisor.

The Geographic Link

Mapping you to the places with the best job opportunities

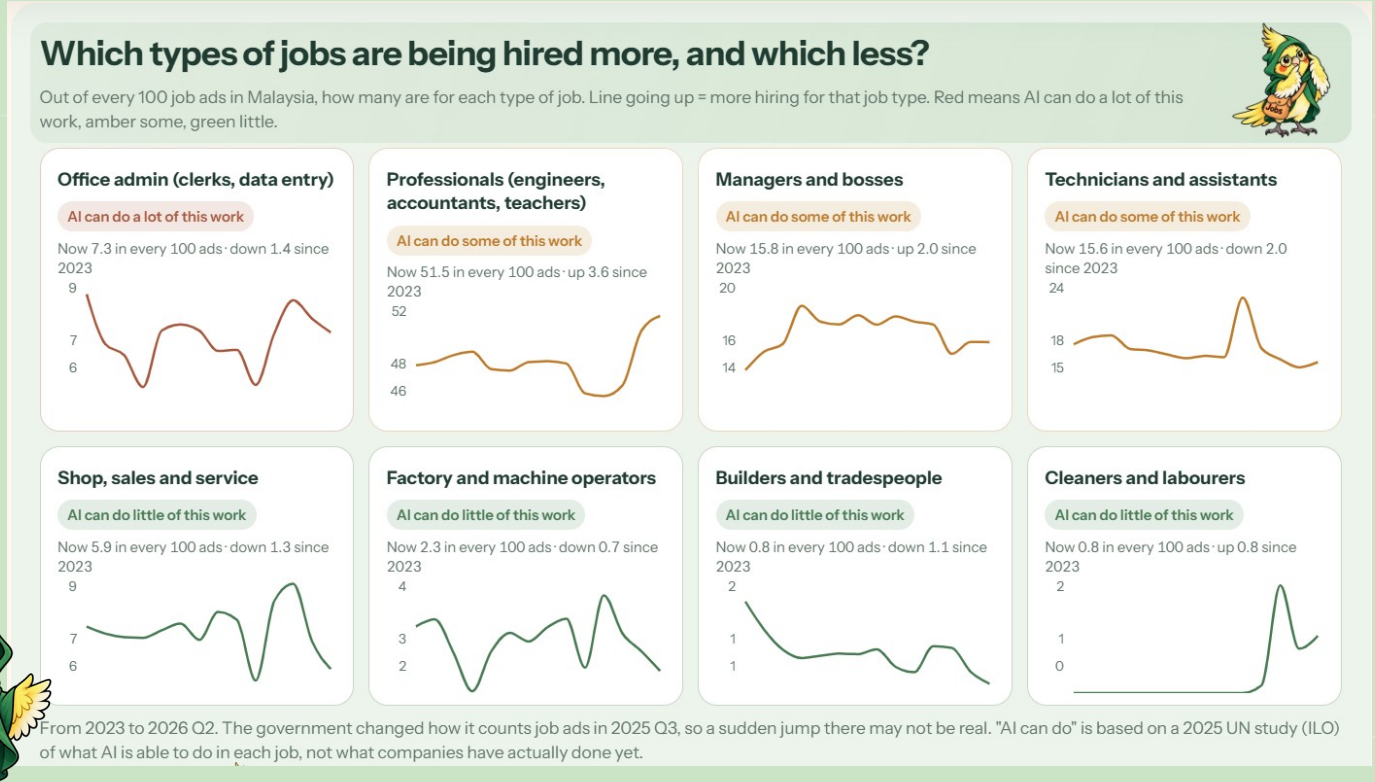

Jobs distributed around Malaysia

Those willing to relocate can make smart decisions based on job abundance.

TRACKING THE INEVITABLE AI-CATALYSED CHANGE

The Statistics:

See with Certainty How the Job Landscape is Changing

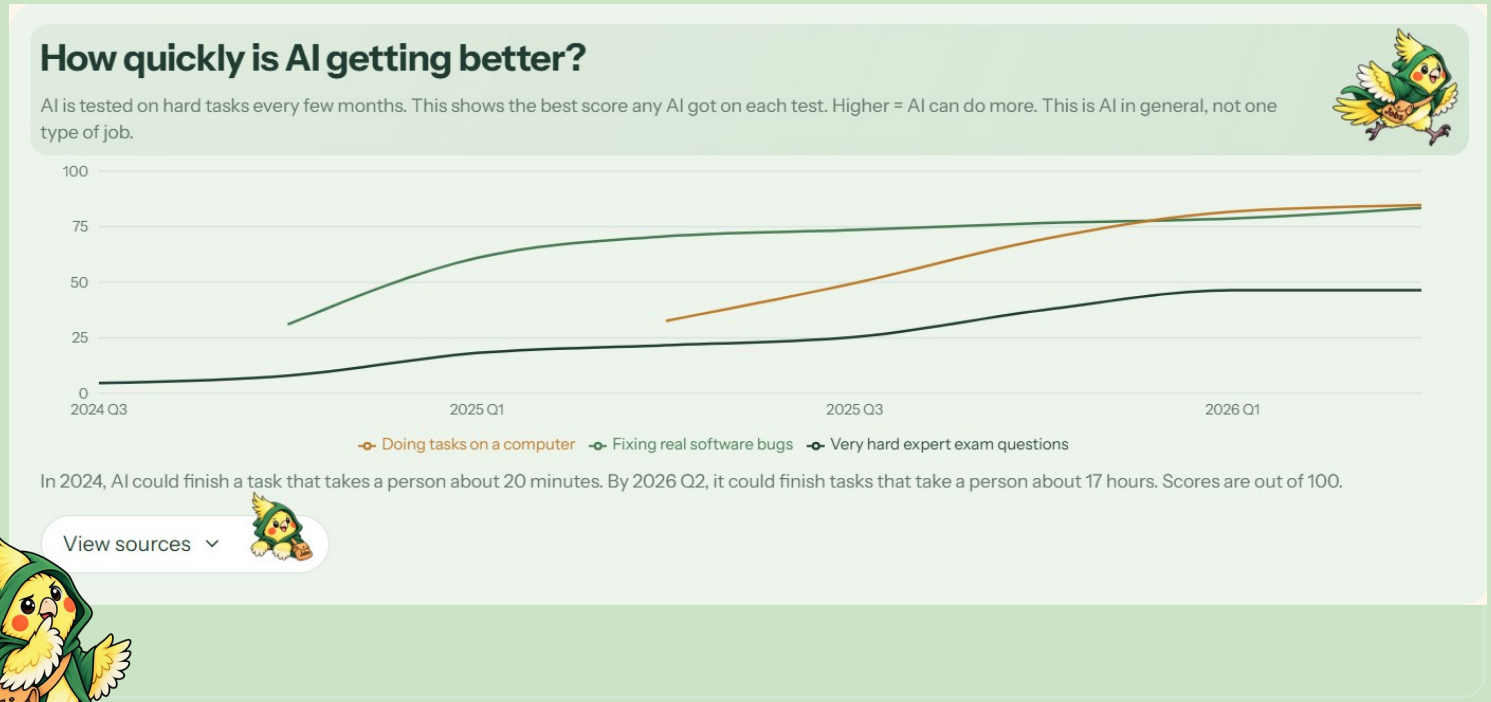

Government-backed statistics

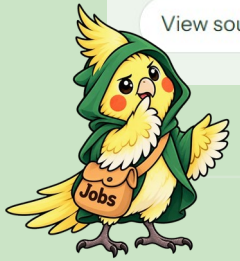

Which jobs are being hired more, which are being hired less.

Skills worth learning

Employers want these and AI cannot easily do them.

Audit and controls testing	UN goal 16
Anti-money-laundering and fraud investigation	UN goal 16
ESG and sustainability reporting	UN goal 12
Procurement and vendor management	UN goal 8
Compensation and benefits	UN goal 8
Chemical and process engineering	UN goal 9
Environmental assessment and monitoring	UN goal 6
Legal administration and contracts	UN goal 16
Communications and public relations	UN goal 8

Skills AI will take over first

The date AI is expected to do most of this work.

Programming fundamentals (Java, C++, JavaScript)	May 2028
Web development (HTML, CSS, JavaScript)	May 2028
Financial analysis and modelling	Jun 2028
Dashboards and BI tools	Jun 2028
Data entry and form processing	Jun 2028
Market research	Jul 2028
Statistics and data analysis	Jul 2028
Machine learning and data science	Jul 2028
SQL and databases	Jul 2028

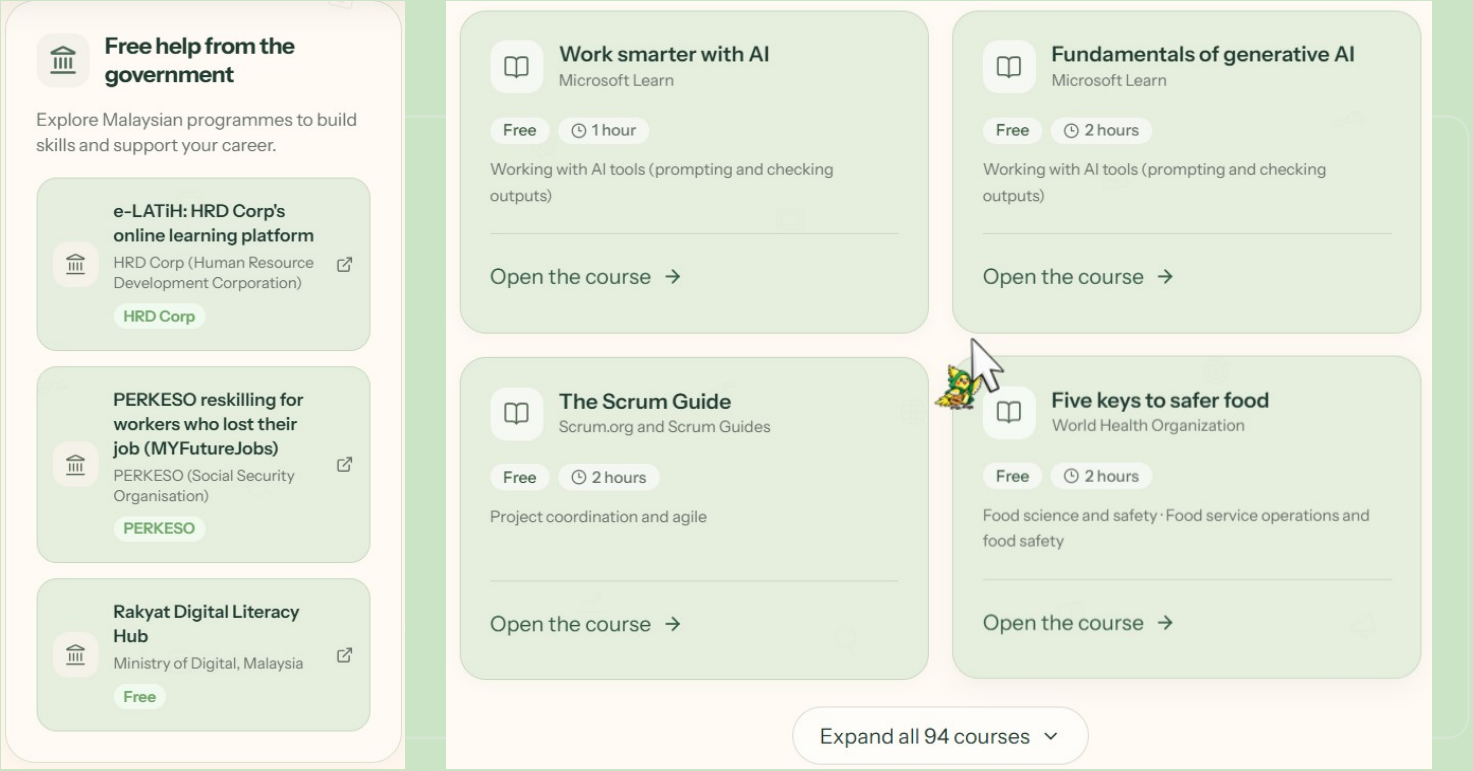

Government-backed statistics

A list of a skills that are worth learning, as well as the SDGs they are related to.
The skills most likely to be taken over by AI are also stated with their expected “deadlines”.

Hand-Picked, Trusted Providers

Embark on a journey of learning

94 free and low-cost courses from trusted providers, plus Malaysian learning programmes.

AI-SKILL FORECASTING PAGE

Predicting the Future Livelihoods of Millions

Why forecasts matter

Nobody knows how fast AI will change jobs. Jobbery keeps three possible speeds in mind and uses the predictions and the real numbers to decide which is most likely. That decides the dates you see for your skills and jobs.

The AI outlook

Updated with the Apr to Jun 2026 numbers

Slow AI progress	Medium AI progress	Fast AI progress
45%	50%	5%
AI improves more slowly than lately, and companies are slow to use it. Office work changes gradually.	AI keeps improving at its recent pace, and companies follow. Routine office tasks shrink steadily.	AI improves faster than lately, and companies rush to use it. Routine office tasks shrink quickly.

These are estimates, not certainties.

› How we calculate this

Think we're wrong?

Make your own prediction on an open question. It is scored when the official numbers come out, and good predictors move these numbers more.

Go to the open questions

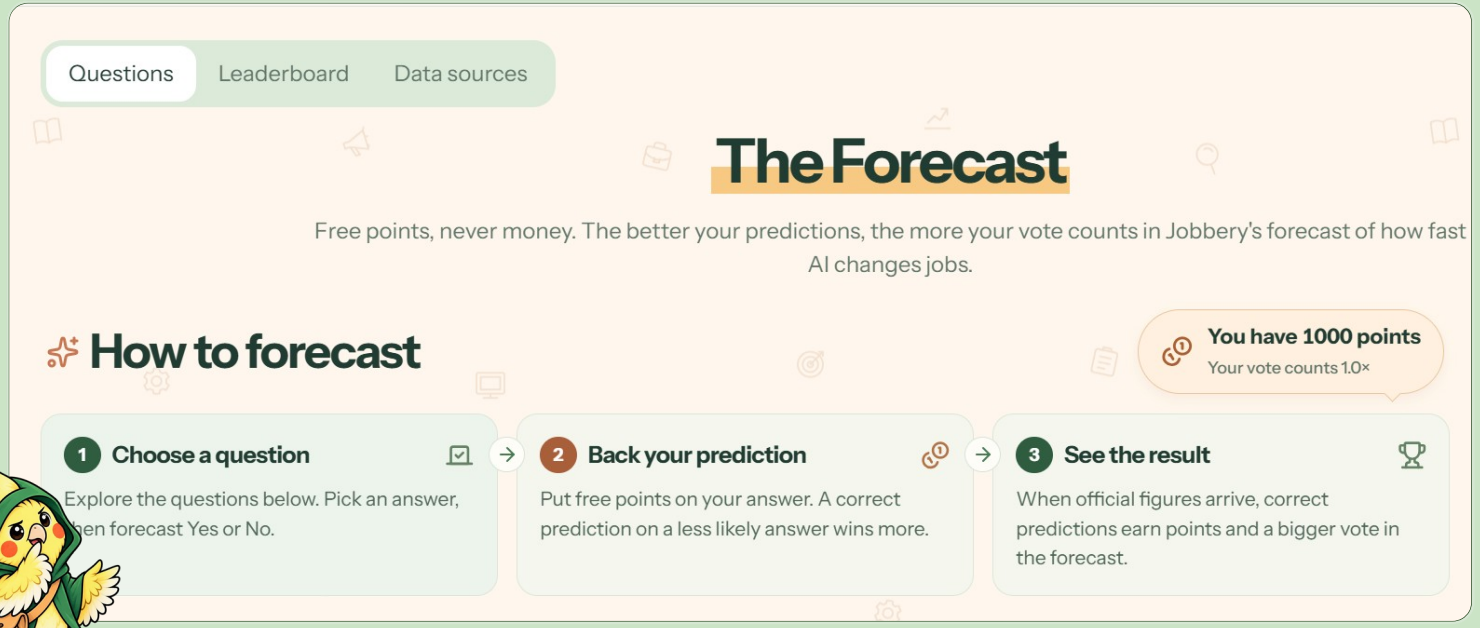

The three futures, with odds

Slow, medium, and fast AI progress. Votes of the forecasters create estimates, not certainties.

AI-SKILL FORECASTING PAGE

The Forecast:
Don’t Just Think Your Thoughts. Share Them.

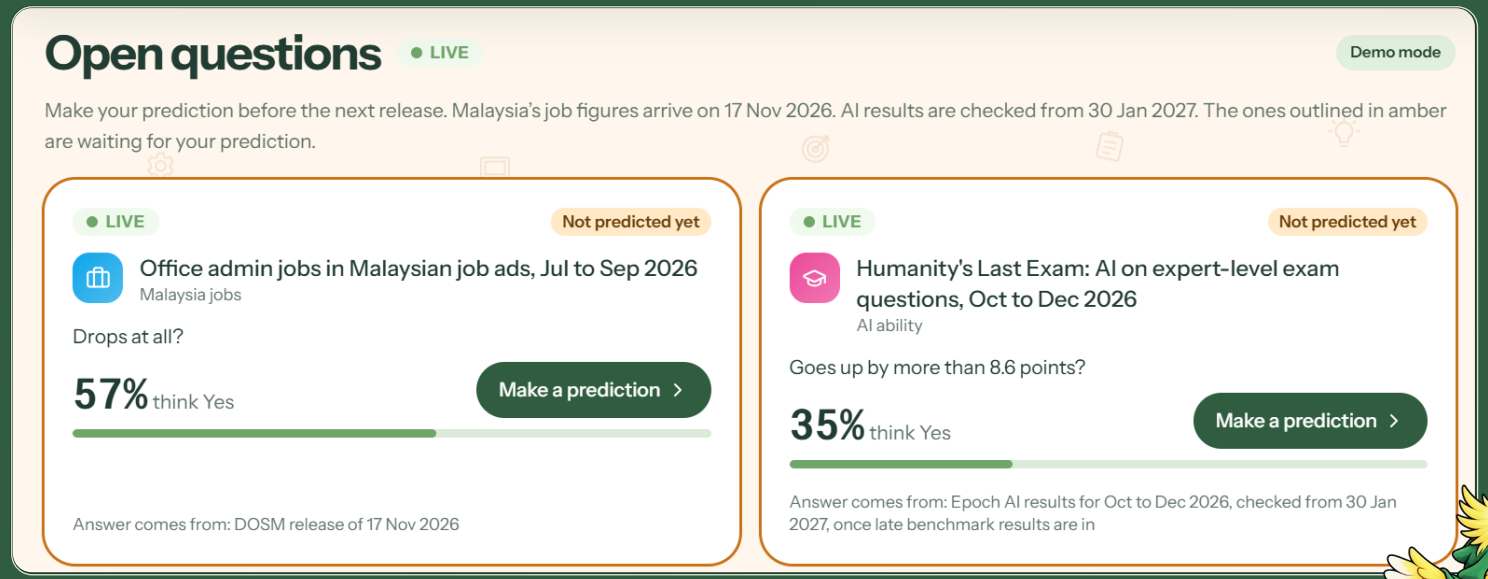

Three steps

Choose a question, spend the free points, then see the result. Correct predictions earn points and improve voting credibility.

AI-SKILL FORECASTING PAGE

The Forecast:
Don’t Just Think Your Thoughts. Share Them.

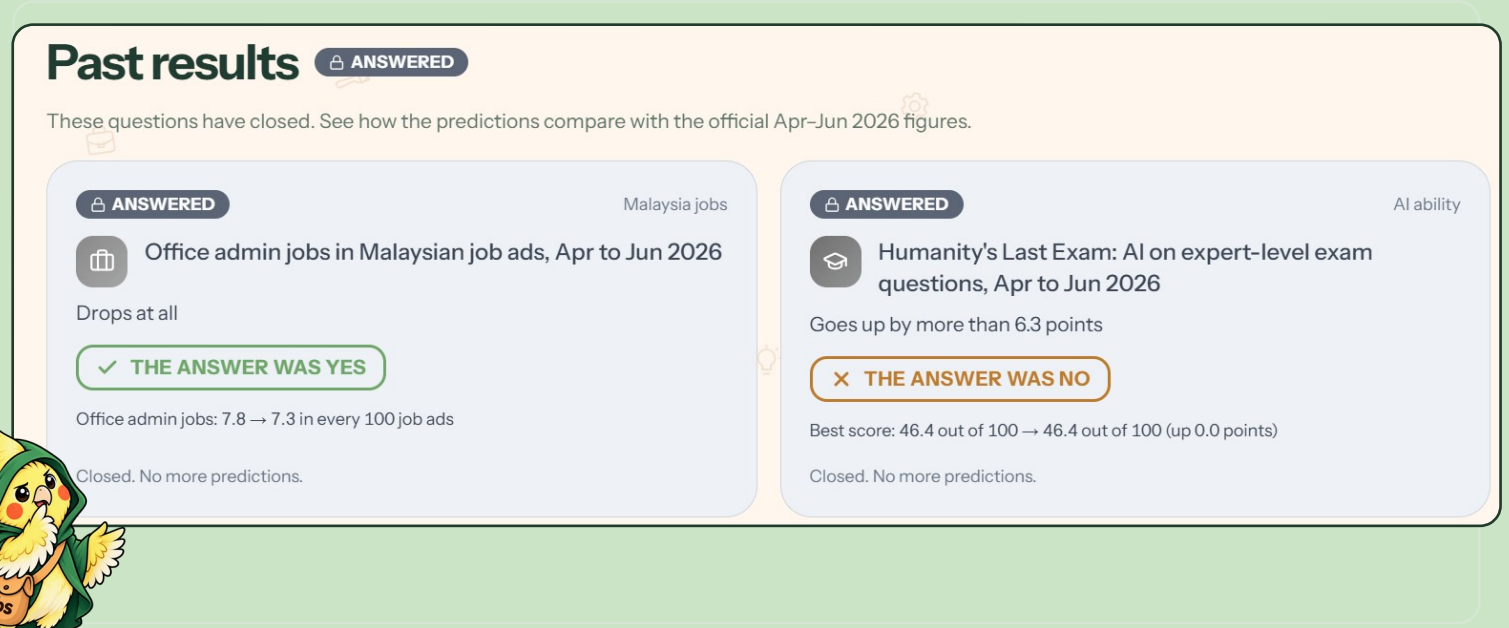

Checkable questions

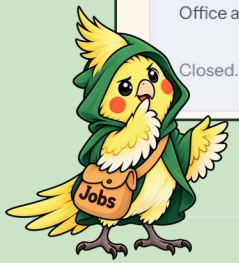

Each card shows the forecasters’ current % and which official news will settle. Amber outlines wait for a prediction.

AI-SKILL FORECASTING PAGE

The Forecast:
Don’t Just Think Your Thoughts. Share Them.

Settled by the data

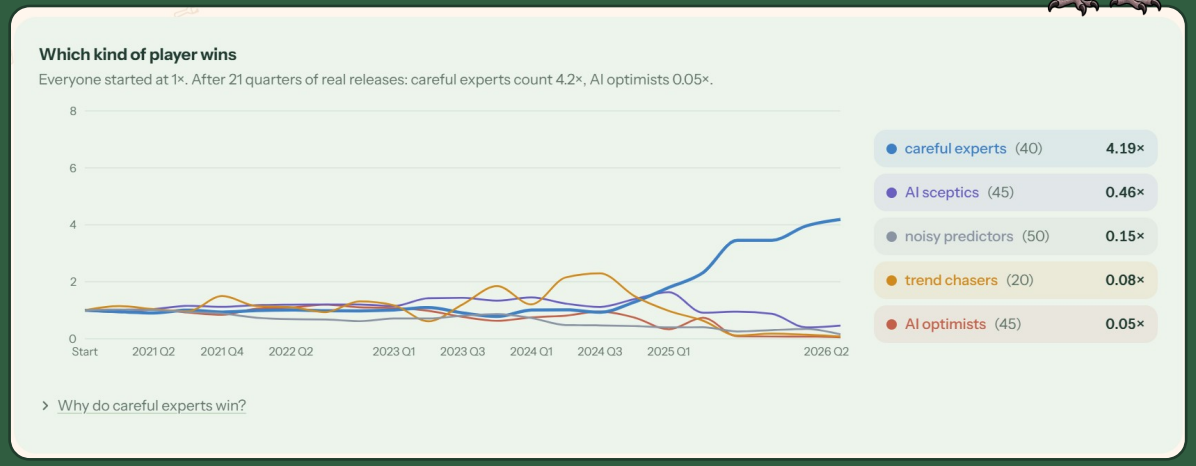

Past prediction results are showcased below. For example, office admin ads fell from 7.8 to 7.3 per 100.

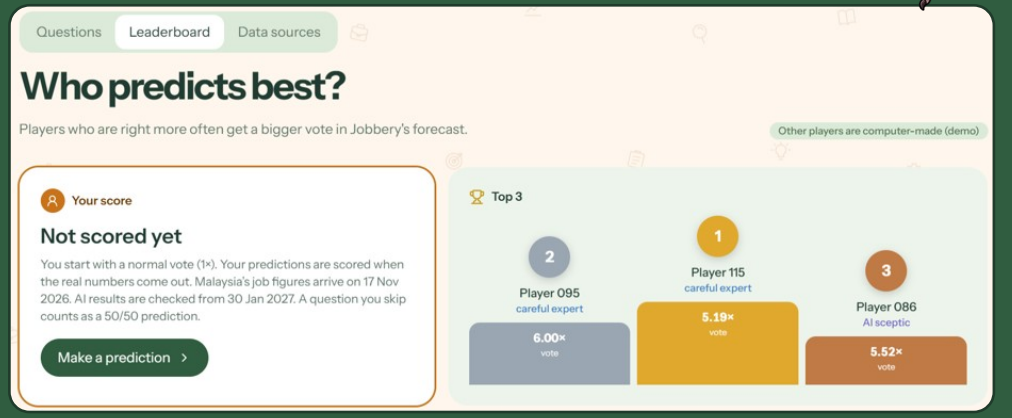

AI-SKILL FORECASTING PAGE

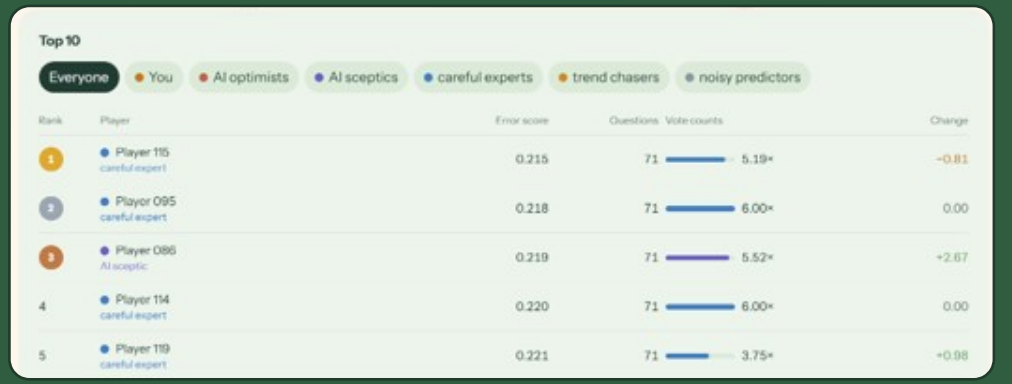

The Forecast: The Leaderboard

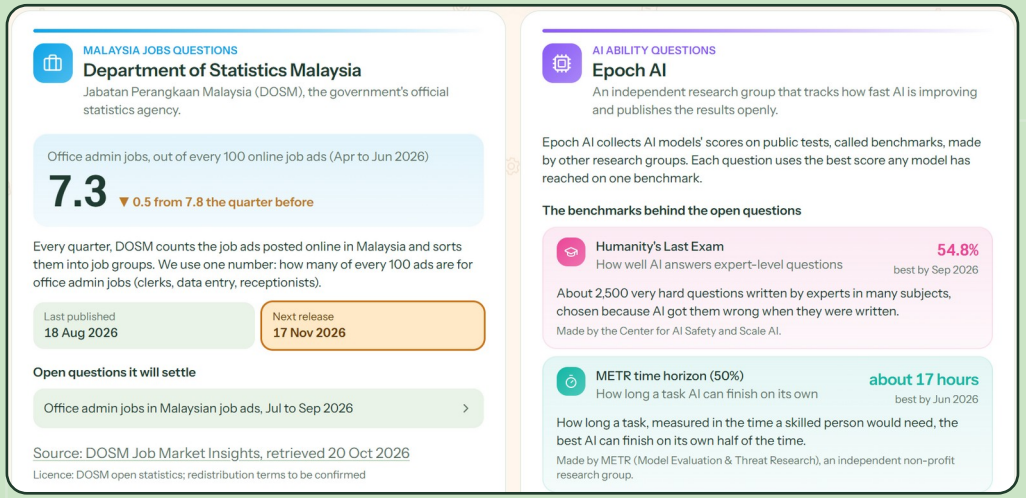

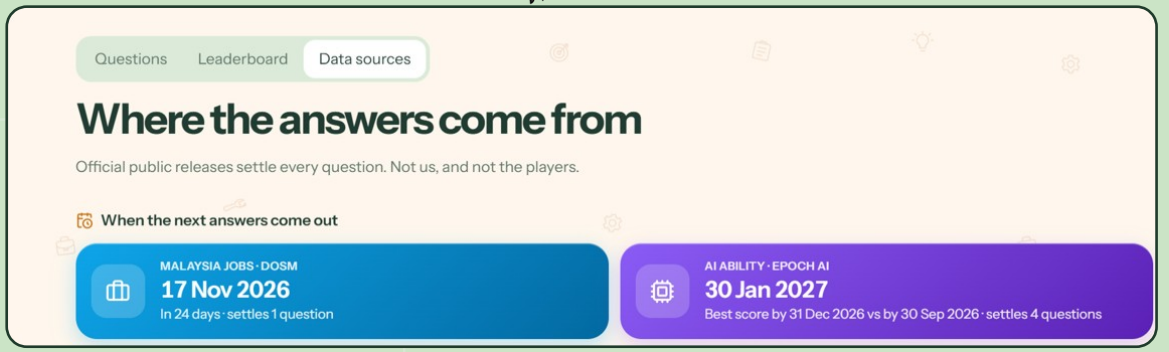

Accuracy earns influence. Making accurate predictions gives you the credibility that amplifies votes and sways future predictions.

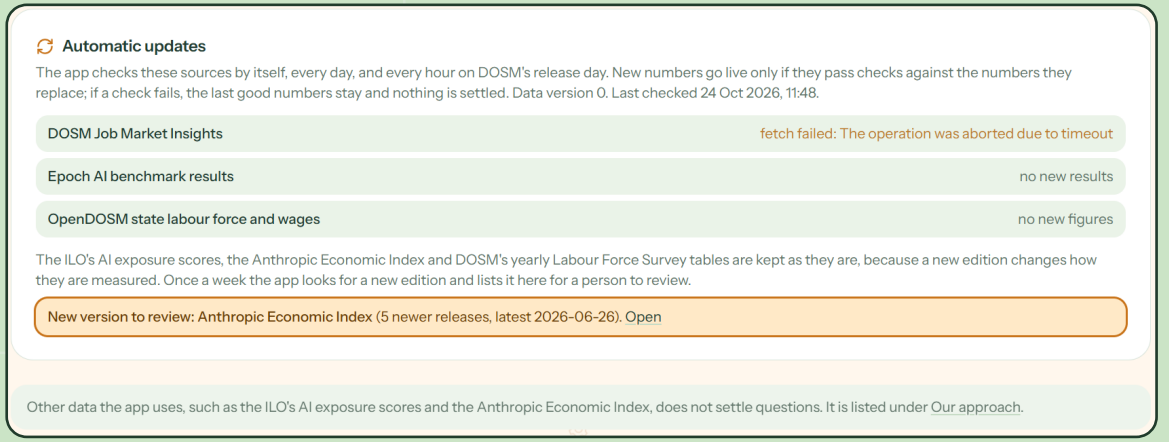

AI-SKILL FORECASTING PAGE

The Forecast: Hand-Picked, Trusted Sources

Official news settles every question. New numbers go live only after passing credibility checks.

Trust: Every Source is Dated and Credible

Source	What it feeds	Latest release in the app	Next
ILO	How much of each job generative AI could do	**2025 exposure scores (WP 140)**	Next edition
Anthropic Economic Index	Which Economic Tasks are Performed by AI	**Release of 10 Feb 2025**	Newer release queued
METR / Epoch AI	How fast AI is improving	**Models to 15 Oct 2026**	Jan 2027
DOSM	Job ads by occupation, every quarter	**2026 Q2, published 18 Aug 2026**	17 Nov 2026
MyCOL	Hard-to-fill occupations in Malaysia	**2024/2025 list**	Queued, not loaded yet
O*NET	Role codes and task lists for 89 roles	**As bundled in the Feb 2025 Index**	With the next Index

One command

Drop in the next workbook and run the build. Open questions settle, the futures re-weight, and every plan recomputes.

Trust: People Stay in Control at Every Step

You choose your path

Jobbery ranks opportunities and provides personalised recommendations for your next career move. Style the courses, weigh your options, and choose the future you want.

Your call

An advisor, on your terms

Book a 30-minute meeting anytime. The advisors are present to help you reach your learning goals and career success.

30-minute slots

Résumés are never stored

Trust us to keep your information private. We keep only the score and the skills you confirm.

Never saved

Fair by test

Age, gender and background are not requested inputs. We match jobs to you based on skill compatibility alone.

Tested on every run

The link to UN's Sustainable Development Goals

SDG 4

Quality education

4.4 Increase the number of people with relevant skills for financial success

SDG 5

Gender equality

5.7 Equal rights to economic resources, property ownership, and financial services

SDG 8

Decent work

8.5 Full employment and decent work with equal pay

SDG 9

Industry, innovation and infrastructure

9.2 Promote inclusive and sustainable industrialisation

SDG 10

Reduced inequalities

10.3 Ensure equal opportunities and end discrimination

Benefactors

- Fresh graduates
- Employed and unemployed workers in the workforce
- Companies who get to future-proof their employees and job postings

Measured metrics

- Percentage (%) increase in website users
- Percentage (%) of users still relying on the provided AI resources.
- Percentage (%) of users who have completed the AI courses and passed the AI quizzes.
- User testimonials

Desired growth

- Percentage increase of website users over time
- Long-term use of AI skills learned through use of the website
- Employment of Jobbery users and large-scale deployment of website in public and private sectors

Jobs
9 INDUSTRY, INNOVATION AND INFRASTRUCTURE
10 REDUCED INEQUALITIES
4 QUALITY EDUCATION
5 GENDER EQUALITY
8 DECENT WORK AND ECONOMIC GROWTH
